

Gesture Cloud

Display system for
virtual & physical
environments.

- this projects images of the avatars, possibly the factory, SL, RW.
- images move around the wall
- webcam senses gallery activity + responds.

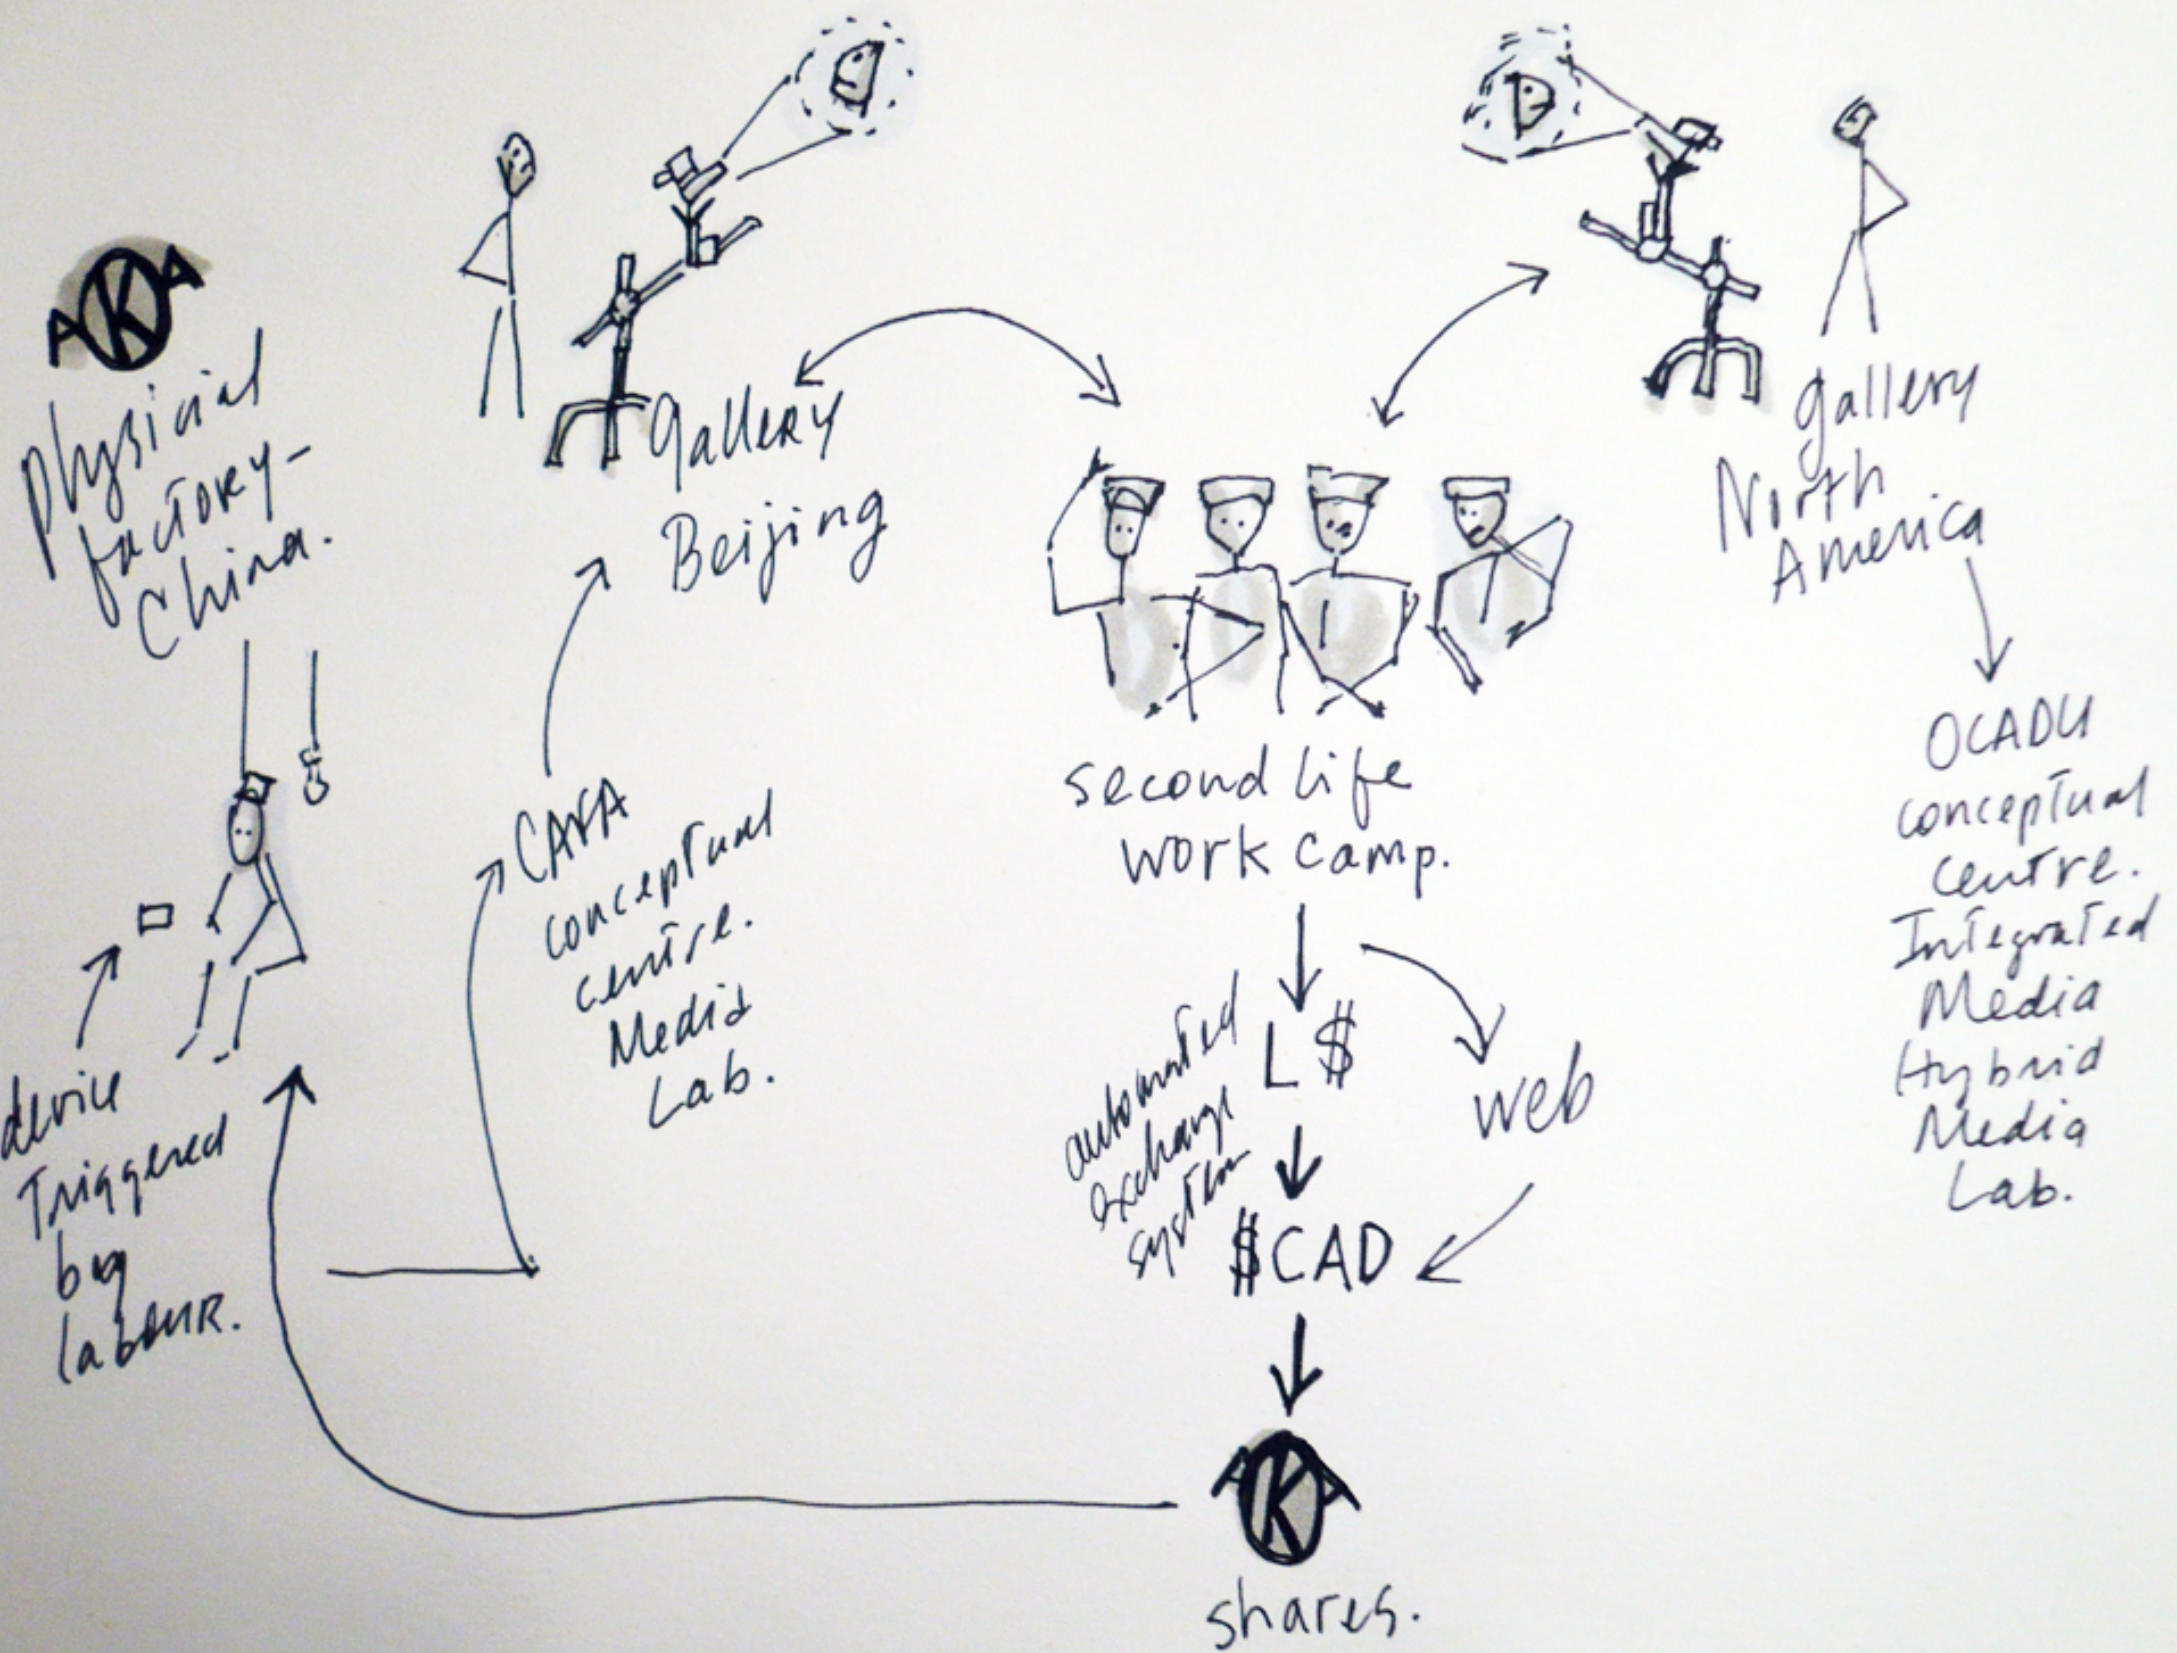

Other possible features

- novel screening surface (3D Threads)
- multiple robots.
- gesture responsiveness
- direct "skype" type feed

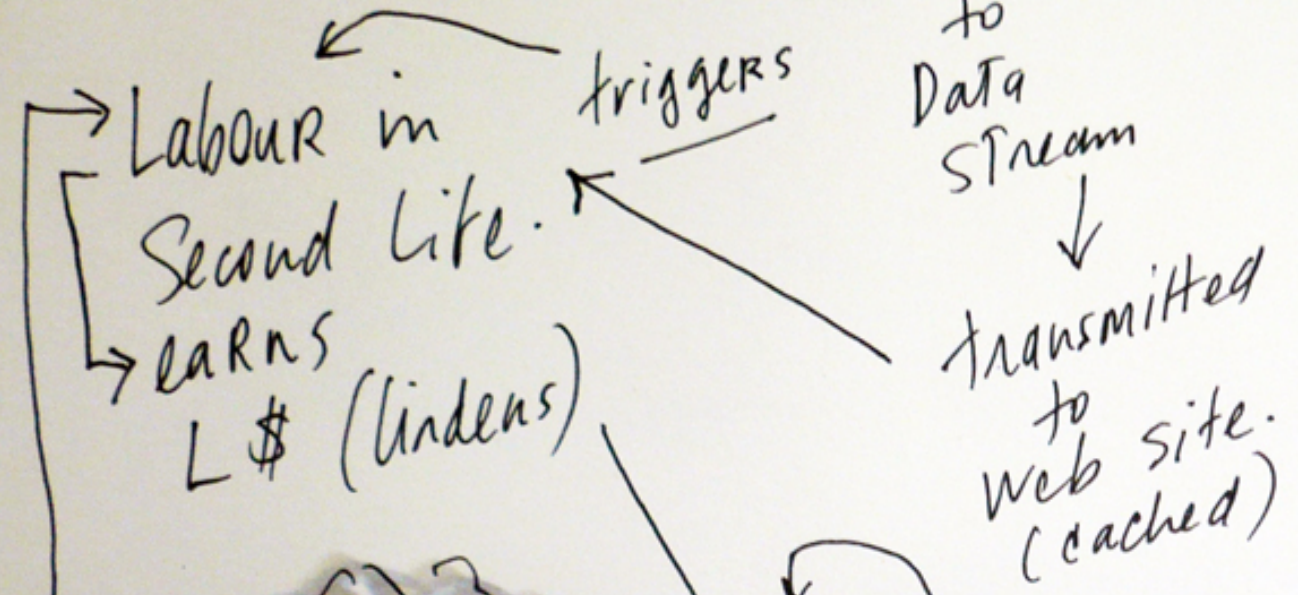

prototype images.

- many video files of "avatar" like figures animated by BVH mocap files

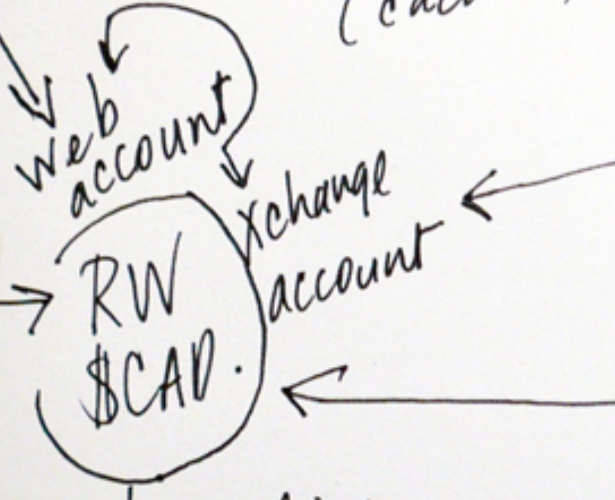

Labour in RW (China)
→ either calibrated or stored via sensor

gallery activity
(i.e. purchase of art product)

online trading (stock instructions, ie. NASDAQ)
auto-mated trade

North America
"The Vending Edge"

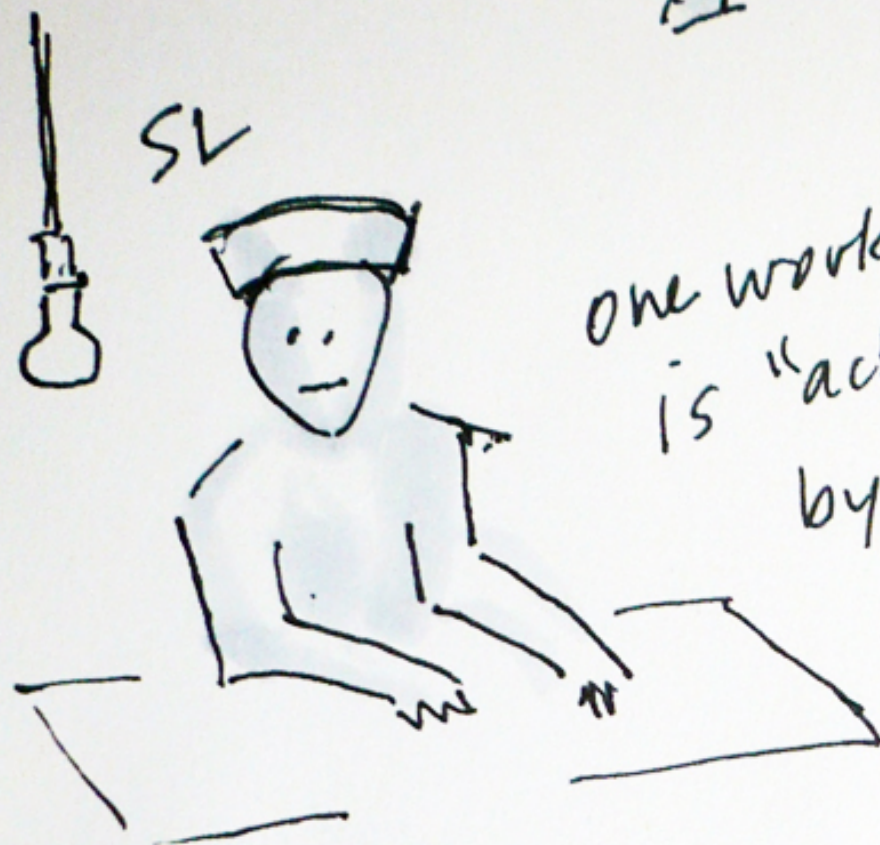

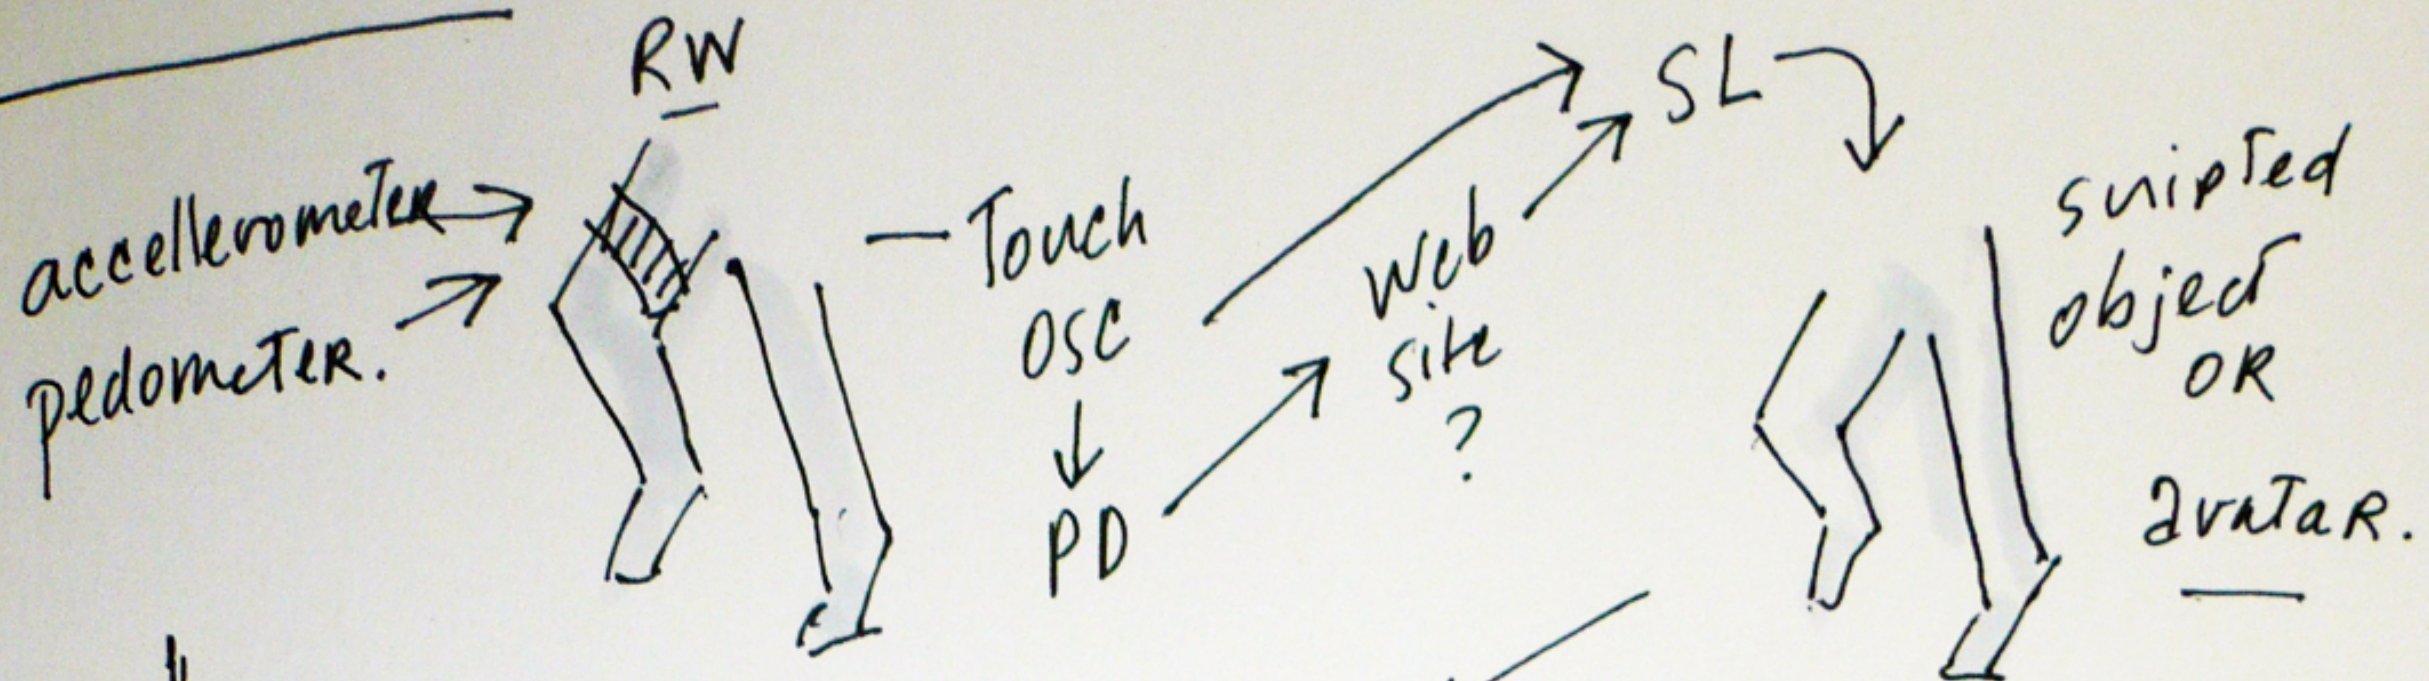

- sale object
- shares
- online deliverable.
ie. HD videos
digital frames
either limited or unlimited edition
like Art Mkt.
subscription

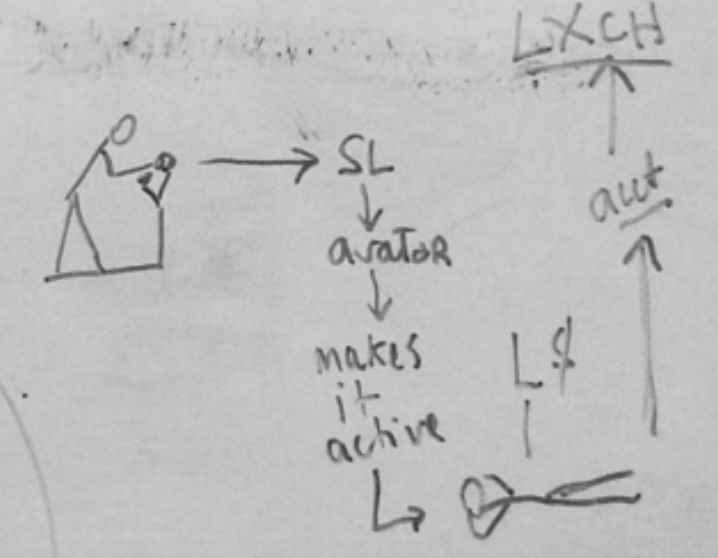

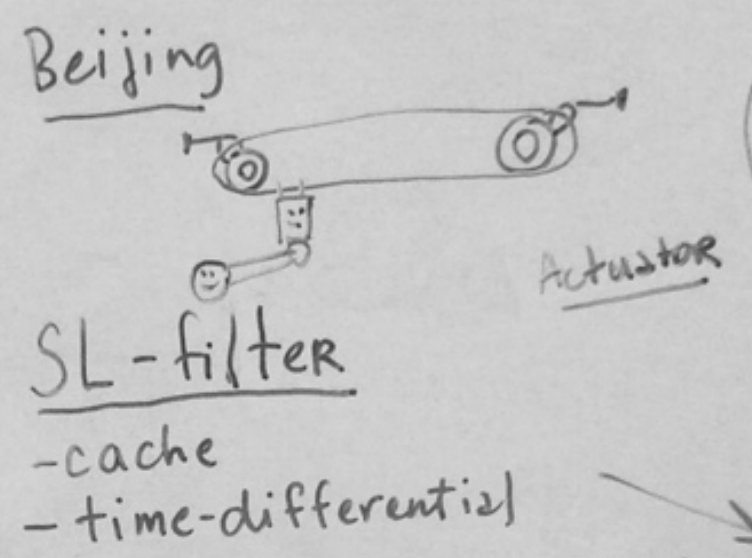

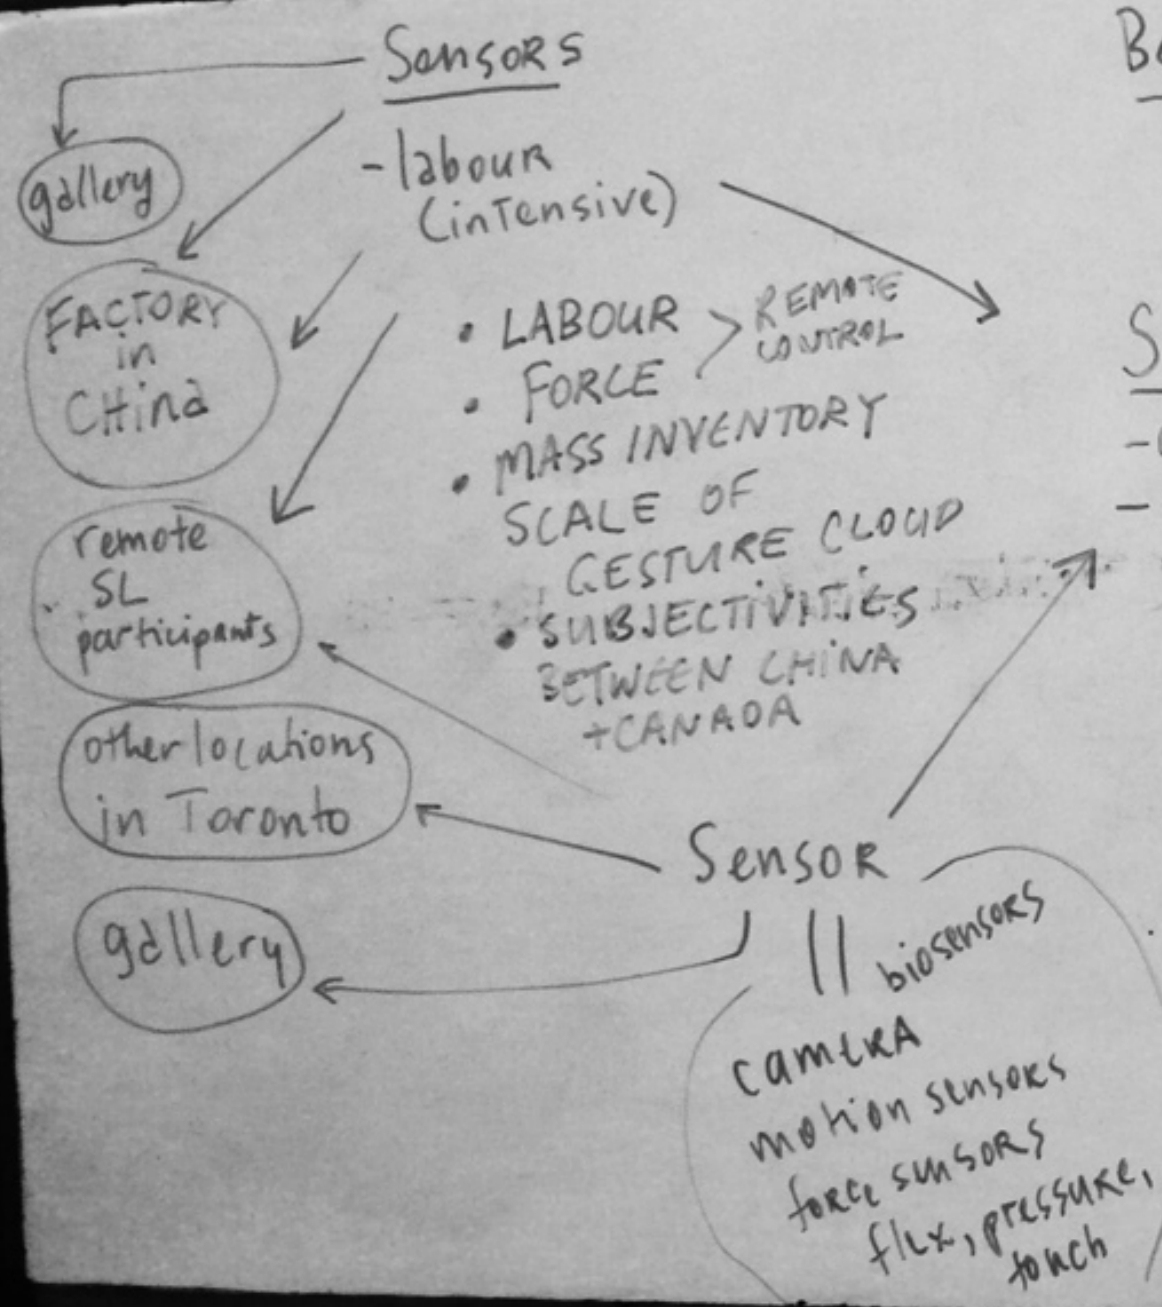

1st/month
All (100) liquidates L\$ into \$CAD. save for the float.

Labour in NA
- either calibrated or stored by sensor

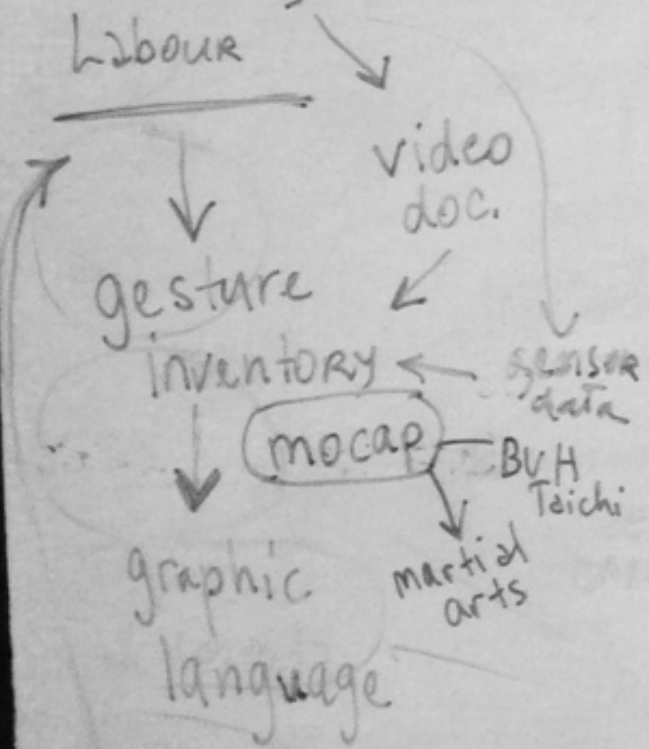

Labor DATA. (prototype only).

one worker in SL
is "activated"
by labour in
RW.

Harvesting
Labour
